

Cameron Stanley

Full Stack Software Developer

813-255-7532 | cam96stanley@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Full stack developer passionate about building scalable, performant web and mobile applications across the entire stack. Proficient in Next.js, Astro, Flask, Prisma, and SQLAlchemy, with experience designing RESTful APIs, managing SQL and NoSQL databases, and crafting responsive, pixel-perfect frontends. Eager to contribute clean, efficient engineering to a solution-driven development team..

Skills

Languages: TypeScript, Python, CSS

Frameworks/Libraries: NextJS, Astro, Tailwind, Hono, Zod, Prisma, Flask, SQLAlchemy

Databases: SQL, NoSQL

Tools/DevOps: Github Actions, Vercel

Certifications: Coding Temple - Full Stack Software Engineer

Experience

FullStack Intern: *Sponsor A Purpose* | Remote

February 2026 - Current

- Engineered full-stack nonprofit websites for clients, leveraging a diverse tech stack including Next.js, Astro, Hono, Prisma, Python, and Tailwind CSS
- Architected scalable project structures and led setup configuration for client deployments, partnering with the lead designer in Figma to ensure precise design implementation
- Contributed to internal CRM development, implementing feature enhancements for donation and form widget modules
- Collaborated directly with the senior developer in an agile feedback loop, consistently delivering revisions accurately and within deadlines

Backend Intern: *Coding Temple* | Remote

July 2025 - September 2025

- Architected and maintained a RESTful API for a React Native rental platform using NestJS and Prisma, designing DTOs, Swagger-documented endpoints, and standardized request/response models for secure, validated client-server communication
 - Implemented role-based authentication and authorization via Firebase Auth, managing access control across user, host, and administrator roles
 - Engineered data pipelines for core user and vehicle workflows, including registration, storage, and admin approval processes, while building and consuming API integrations between the admin portal and main application
 - Served as Scrum Master in an Agile environment, leading sprint planning, stand-ups, and retrospectives while collaborating with frontend developers to ensure seamless API integration
-

Education

Coding Temple, Certificate - Software Engineering
